

I would like to request that the FCC reject NAB'S petition 04-160 to stop XM Satelite Radio from providing local broadcasting to it's comsumers especially local weather and road conditions. When we travel out of our local area we are often unable to recieve this information and especially when we travel out of state or distance driving within the state. I believe that the prohibition of XM to provide the best quality radio service to it's customers is a violation of free interprise. If other stations are objecting to XM'S broadcasting let them provide the same quality service. Sincerely, S. Bennett
